

## PRESS RELEASE

Endeavor Air expands dentCHECK use to enhance the quality and efficiency of dent-mapping workflows.

### **Endeavor Air has implemented dentCHECK at multiple bases to streamline dent-mapping and reporting workflows.**

CONSTANCE, GERMANY & RANCHO CUCAMONGA, CALIFORNIA, AUG 22, 2024.

“dentCHECK was the right device to expand our capabilities and advance Endeavor Air’s efforts of integrating more technology in our hangars,” said Bob Olson, Director of Quality and Training, Endeavor Air. “Our fleet readiness has greatly benefited from dentCHECK. The device has improved our team’s efficiency by expediting the repair determination process from our engineering team, and overall, dentCHECK has improved the time it takes to return our aircraft to an airworthy condition.”

"We are thrilled to welcome Endeavor Air to the expanding family of dentCHECK customers at 8tree," expressed Leonard Buck, Marketing Manager, 8tree. "Endeavor Air joins the rapidly growing global community of more than four dozen airlines, MROs and OEMs across a wide variety of commercial, cargo, business and defense aircraft, who rely on dentCHECK for verifiable end-to-end digital damage-mapping and reporting. We are genuinely looking forward to supporting Endeavor Air’s maintenance operations."

The dentCHECK platform is the world's only handheld-portable, completely wireless 3D scanner tool that delivers AR-enabled 3D digital damage-mapping and reporting of aircraft. dentCHECK is recognized by all major aerospace OEMs. It can also be found integrated into drones and robotic automation cells. Leading Airlines & MROs across the Commercial, Military, Cargo and Business aviation sectors use 8tree's dentCHECK tool and 8tree's dentCHECK-as-a-service for mapping aircraft damage and creating detailed SRM-compliant digital damage reports.

With integrated AR, dentCHECK empowers the aircraft technician with instant, actionable measurements for critical airframe damage while boosting consistency (18x), accuracy (20x), efficiency (90% time-savings) and eliminating human-subjectivity, compared to traditional manual inspection methods. dentCHECK delivers precision measurements ‘as simple as taking a photo’, and enhances safety through an improved understanding of airframe reliability.
